Thank you

Thank you for purchasing a BRANZ Epub. Epubs can be read on your desktop computer, laptop, tablet and smart phone. This guide gives you basic instructions on how to view your BRANZ Epub.

Getting started

Consider the following:

- What device will you use to download the Epub?
- On what device do you wish to read it?

There is some advantage to downloading it directly to your mobile device.

- Visit the Epub section of the BRANZ website through an internet browser **www.branz.co.nz/epubs**.
- Go through the purchase and checkout process. (You will be prompted to join My BRANZ or log in to your My BRANZ page.)
- Go to your My BRANZ page. Under the 'Download files' section will appear a list of files you can download, including any Epubs you have purchased.

IMPORTANT NOTE: You need to download an eReader program to your desktop computer or laptop **before** you can view an Epub, for example, Azardi, Adobe Digital Editions, iBooks or Calibre.

The next steps are device specific. Choose the device you are going to download the Epub to.

For Apple iPad and/or iPhone

Downloading to your device

- Press the title of the Epub in your 'Download files' list. Depending on which eReader you have on your device, you will be asked one or both of the following questions (there may be a small delay before these appear):
 - 'Open in...' (Pressing this button will list the apps on your device that can open .epub files. Select your favourite eReader app.
 - 'Open in iBooks'. iBooks is the default epub reading app in recent versions of iOS.
- Open the eReader you selected to view the Epub.

Downloading to your desktop computer or laptop for uploading to your device

You will need the Apple iTunes program on your computer or laptop for this process. iTunes is available for free from the Apple website.

- Download the Epub to your desktop computer or laptop from your My BRANZ page on the BRANZ website.
- Open iTunes.
- If iBooks is the eReader you use on your iPad or iPhone:
 - Drag the .epub file over the library section in iTunes (top left). This copies the .epub file into iTunes.
 - Sync your iPad or iPhone to upload the Epub to your device.
 - Open iBooks on your device to view the Epub.

If you use another eReader on your iPad or iPhone:

- Make sure you can see your iPad or iPhone in the list of devices.
- Select your device.
- Select the 'Apps' tag, which will show the apps you have on your device.
- Under the 'File Sharing' section find the eReader app you have.
- Drag the .epub file into the 'Documents' window of that app. This uploads the Epub to iTunes.
- Sync your device to upload the Epub to your device.
- Open the eReader app on your device to view the Epub.

For Android and other devices

Downloading to your device

For devices running Android, Windows or other operating system an epub reader will need to be installed on the device. Epub apps are typically available for the relevant App Store.

- Press the title of the Epub in your 'Download files' list from the My BRANZ section of the BRANZ website.
- The Epub will download to your device's 'Downloads' folder, which is represented as an icon on the desktop or in the apps folder of the device.
- Press the title of the .epub file. Your device will ask you which eReader app you wish to use to open the Epub (e.g. Aldiko).
- Open the eReader app to view the Epub.

Downloading to your desktop computer or laptop for uploading to your device

The process for getting .epub files onto your non-Apple device varies for each manufacturer. Please refer to user instructions for your device.

For desktop computer or laptop

- Press the title of the Epub in your 'Download files' list from the My BRANZ section of the BRANZ website. Depending on the type of computer and operating system you use, download behaviour may vary.
- Save the .epub file on your desktop computer or laptop.
- Navigate to the file and click to open. Your system should recommend/select the software application to best open that file.

If you don't have software on your computer that opens Epubs you will need to download and install one on your desktop computer or laptop.

BRANZ recommends the following free Epub readers:

Azardi – azardi.infogridpacific.com/

Calibre – calibre-ebook.com/

Adobe Digital Editions – www.adobe.com/solutions/ebook/digital-editions/

Apple iBooks – is the default epub app for Macs running the more recent updates to the OSX 10 operating system.
